## EDUCATION

### Federal University Of Petroleum Resources

Bachelor of Engineering, Electrical/Electronics Engineering

Delta State, Nigeria.

**March 2013 – October 2019**

---

## SKILLS SUMMARY

- **Languages:** HTML, CSS, JavaScript
- **Frameworks and Libraries:** React, NextJs, ExpressJs, NodeJs, Mongoose
- **Tools:** REST-API, GraphQL, MongoDB, MongoDB Atlas, Web Sockets, Prisma, Supabase, Vite
- **Platforms:** Visual Studio Code, Visual Studio
- **Soft Skills:** Communication, Problem Solving, Time Management, Teamwork, Adaptability

---

## WORK EXPERIENCE

### FRONTEND DEVELOPER | SHC Marketing Agency

**March 2023 – July 2024**

- ❖ Develop and maintain responsive websites for diverse client portfolio using HTML, CSS, and JavaScript
- ❖ Collaborate with designers to implement pixel-perfect UI/UX designs
- ❖ Optimize website performance and ensure cross-browser compatibility
- ❖ Assist in integrating websites with content management systems (CMS)
- ❖ Participate in code reviews and implement feedback to improve code quality
- ❖ Stay updated with latest frontend technologies and best practices

---

## PROJECTS

### Fintech App | [Link](#)

- ❖ Developed Horizon, a fintech application using NextJs
- ❖ Integrated Plaid API for secure bank account connections
- ❖ Implemented Dwolla for managing and processing money transfers
- ❖ Utilized Appwrite for user authentication and database management
- ❖ Created user registration system and maintained user data

### Threads App Clone | [Link](#)

- Developed a full-stack Threads clone application using Next.js framework
- Implemented user registration and authentication system using Clerk
- Integrated MongoDB for efficient user database management
- Replicated core Threads functionalities, including:
  - ❖ User profile creation and customization
  - ❖ Post creation and sharing
  - ❖ Threading and nested replies
  - ❖ Like and repost features.

- Ensured responsive design for seamless user experience across devices
- Optimized application performance for fast loading and smooth interactions
- Implemented real-time updates for new posts and interactions
- Created a RESTful API for handling data operations between frontend and backend

---

## CERTIFICATES

### Azure Fundamentals | Certificate

April 2023

- ❖ Acquired foundational knowledge of Azure services, cloud concepts, and core Azure principles
- ❖ Developed a sound understanding of Azure pricing, support, and governance.
- ❖ Equipped with the ability to explain basic cloud concepts and Azure architecture, supporting effective cloud adoption and deployment.

### Azure Administrator Associate | Certificate

February 2024

- ❖ Skilled in administering Azure subscriptions, implementing storage solutions, configuring virtual networks, managing Azure Active Directory (AD), as well as monitoring and optimizing resources.
- ❖ Translated theoretical knowledge into practical applications, such as setting up virtual machines (VMs), configuring load balancers, executing backup strategies, and automating tasks using Azure Resource Manager (ARM) templates and Azure CLI.
- ❖ Developed proficiency in identifying and resolving Azure resource issues, while enhancing cloud environments for improved performance and cost-effectiveness.
- ❖ Acquired a solid understanding of Azure security tools, managing role-based access control (RBAC), deploying network security groups (NSGs), and ensuring compliance with industry regulations.
